

# Electronic Logging Device

PrePass ELD is a streamlined, simple solution to hours-of-service (HOS) compliance that can be added as an additional, low-cost service to PrePass.

This mobile application takes seconds to install: simply plug the OBD device into the truck's diagnostic port, and PrePass ELD will begin tracking movement and driver hours. It's straightforward and records only the data required by law. And because it's part of the PrePass family of services, PrePass ELD includes the same high standards for data privacy and customer support you've come to expect.

## Economical compliance, plain and simple.

PrePass ELD has all the electronic logging benefits you need, and nothing you don't.

- MEET ALL REQUIREMENTS to comply with FMCSA regulations
- COST EFFECTIVE at \$12.99 for weigh station bypass customers and \$14.99 stand alone
- SAME CUSTOMER SERVICE you've come to expect with PrePass
- NO EXTRA HASSLE because it's easy to use on your own mobile device
- SIMPLIFIED PERFORMANCE TRACKING with included web-based reporting
- IMPROVE SAFETY SCORES and pass more inspections by avoiding HOS violations

## Focus on what's important: Safety.

PrePass ELD is designed with smaller fleets in mind. Not only can PrePass ELD keep you in compliance with hours-of-service logs, it lets you track fleet performance through its cloud-based, central management portal. Keeping track of hours on the road goes beyond following the law: it's about keeping drivers – and everyone else on the road – safe.

**PrePass Safety Alliance** provides PrePass weigh station bypass and toll payment services. Trucking industry leaders, enforcement agencies and state DOTs first formed the non-profit public-private partnership in 1993 to improve commercial transportation safety and efficiency. The organization has invested over \$700 million to deploy truck safety services and infrastructure nationwide.
